

Team Presentation of City Design and Model (0-90 Points)

Judge's Name

Future City Name: _____

School Name: _____

The judging teams will complete this section. Judges will answer these questions and assign a point value for each question. This sample judging form is provided to the students so they know the components of the judging criteria.

Students will be given from 5–7 minutes to present their city to a group of judges. After the students are finished with their presentation, please ask the students about their city. If a student cannot answer a question, give the other students on the team a chance to respond. Ask the team members at least three questions. As a judge, you will be given mandatory questions to ask each team. These engineering-related questions will be sequestered until the actual competition.

Presentation Score Sheet

1. Delivery/Presentation (0-40 points)		
(a) Did the students present their city to the judges in an informative and concise way?	0-10 points	
(b) Did the students discuss the benefits and aesthetic quality of their city?	0-10 points	
(c) Did the team use any additional presentation tools to explain their city?	0-10 points	
(d) Was the team creative with the delivery of their presentation?	0-10 points	
2. Knowledge (0-30 points)		
(a) How well did the students answer questions about their city?	0-10 points	
(b) Did the students accurately answer questions with supporting factual statements?	0-10 points	
(c) Did the students have an understanding of the various componets of this competition including computer design, essay, model and presentation?	0-10 points	
3. Cooperation (0-20 points)		
(a) How well do the students work as a team during their presentation?	0-10 points	
(b) How well do the students work as a team during the Question and Answer session by the judges	0-10 points	
Total Points	0-90 points	

Was the presentation completed in the 5-7 minute time frame? ____ (yes or no)
